QUESTION NO: 1

How does the Microsoft Graph SDK address throttled responses?

A.
Applications that use the Microsoft Graph SDK are not subjected to throttling, only applications that use the Microsoft Graph API.

B.
The Microsoft Graph SDK internally handles the delay and resubmission of a request when it receives a throttling response.

C.
The Microsoft Graph SDK does not do anything to address throttled responses. Applications that use the Microsoft Graph SDK must handle throttled responses the same way when using the Microsoft Graph API.

Answer: B
Explanation:

QUESTION NO: 2

Applications can avoid from being throttled in various ways except for which of the following?

A.
An application can minimize the number of complex requests over a short period of time to Microsoft Graph.

B.
An application can minimize the number of requests to Microsoft Graph using batching, delta query and change notifications.

C.
An application author can purchase an enterprise agreement from Microsoft Graph to avoid being throttled.

Answer: C
Explanation:

QUESTION NO: 3

Applications can request only new and updated resources from Microsoft Graph which of the following ways?

A.

Submit an initial request and include the delta function. Use the returned deltaLink property when submitting the next request to Microsoft Graph to receive only the entities that have been created or changed since the initial request.

B.

When submitting a request to Microsoft Graph, include the desired date and time to the delta function to receive all entities that have been added or changed since that time.

C.

When submitting a request to Microsoft Graph, include the desired date and time to the changedSince function to receive all entities that have been added or changed since that time.

Answer: A
Explanation:

QUESTION NO: 4

Suppose you have a system that contains sales contacts, and your sales team regularly needs to search for contacts, share them with the team, and have a conversation about them.

What Microsoft Teams extensibility point would be most suited to facilitate this process?

A.
A conversational bot in a channel.

B.
A messaging extension with a search command.

C.
A personal app with a tab.

Answer: B

Explanation:

This is a good scenario for a messaging extension with a search command.

QUESTION NO: 5

Which of the following is **NOT** part of your Microsoft Teams app package?

A.
Your app icons.

B.
HTML formatted app description.

C.
Your app manifest file.

Answer: B
Explanation:

Metadata for your app is included in your app manifest, in JSON format.

QUESTION NO: 6

If your app is for a particular company, which distribution model should you choose?

A.
Publish your app to the public app store.

B.
Distribute your app package for users to install directly.

C.
Publish to the organizational app catalog.

Answer: C
Explanation:

Apps in an organization app catalog can be installed by any user in that company with

the correct permissions.

QUESTION NO: 7

Which of the following tasks can you not do with App Studio?

A.
Create or edit the manifest for a new or existing Microsoft Teams app.

B.
Write the code for a custom tab, bot, connector, or card.

C.
Preview cards created in App Studio.

Answer: B
Explanation:

QUESTION NO: 8

Which of the following statements isn't a valid requirement for custom tabs?

A.
Webpages loaded in a tab must be loaded from an HTTPS secured endpoint.

B.
Webpages loaded in a tab must support loading in an iframe.

C.
All content pages loaded in tabs must implement their interface with a web framework, such as React, Angular, or Vue.js.

Answer: C
Explanation:

This isn't a requirement for a content page.

QUESTION NO: 9

How do personal tabs differ from channel tabs?

A.

Personal tabs can be installed in 1:1 chats and the app bar. Channel tabs can only be installed in channels.

B.

Personal tabs can be installed in channels but can only be seen by the user who installed it. Channel tabs can be seen by everyone in the channel.

C.

Personal tabs should display information relevant only to the individual. Channel tabs display information relevant to members in the team.

Answer: C
Explanation:

QUESTION NO: 10

Which type of tab can have both configuration and remove pages?

A.
Channel tabs

B.
Personal tabs

C.
Channel and personal tabs

Answer: A
Explanation:

QUESTION NO: 11

Which of the following statements is true about Office add-ins?

A.
Add-ins can run only in Office on Windows, Mac, and iPad/iOS.
